

TOP OF CAR ADJUSTABLE HAND RAIL

The ALC Adjustable Hand Rail provides a seamless on-site installation solution for top of car safety applications. Modular design elements allow the rail to recess with itself, giving you the ability to set the size of the frame to your own specific dimensions.

Specifically designed to accommodate most lift cars, the Adjustable Top of Car Hand Rail is fully certified to meet Australian Standards.

Each Adjustable Top of Car Hand Rail comes with one rear frame, two side frames, braces, Stainless Steel kickboard, an assembly kit and three warning labels.

- Fixed frame height: 1115mm
- Adjustable rear frame dimensions: 1200mm - 2220mm
- Adjustable side frame dimensions: 485mm - 830mm or 1200mm-2220mm
